

UNIVERSITY OF NIGERIA, NSUKKA (UNN)

GRADING SCALE, DEGREE CLASSIFICATION, AND CGPA CALCULATION SYSTEM

1. GRADING SCALE AND AWARDING SYSTEM

The University of Nigeria, Nsukka (UNN) utilizes a standard 5-point grading system regulated by the National Universities Commission (NUC). Academic performance in each course is assigned a letter grade and a corresponding grade point based on the percentage score obtained.

Percentage Score	Letter Grade	Grade Point (GP)	Degree Classification Range
70% – 100%	A	5.00	First Class (4.50 – 5.00)
60% – 69%	B	4.00	Second Class Upper (3.50 – 4.49)
50% – 59%	C	3.00	Second Class Lower (2.40 – 3.49)
45% – 49%	D	2.00	Third Class (1.50 – 2.39)
40% – 44%	E	1.00	Pass (1.00 – 1.49)
0% – 39%	F	0.00	Fail (0.00 – 0.99)

2.

MINIMUM PASSING AND GRADUATION REQUIREMENTS

Maximum Achievable Grade

The highest possible academic achievement is a Cumulative Grade Point Average (CGPA) of 5.00.

Minimum Passing Grade Per Course

The minimum passing grade for an individual course is Grade E, which carries a Grade Point of 1.00 and corresponds to a score range of 40%–44%.

Minimum Requirement for Graduation

To qualify for the award of an undergraduate degree, a student must obtain a final CGPA of at least 1.00. Any final CGPA below 1.00 falls within the Fail category and does not qualify for graduation.

3. CGPA CALCULATION METHODOLOGY

The Cumulative Grade Point Average (CGPA) is calculated by dividing the Total Quality Points (TQP) earned by the Total Credit Units (TCU) registered and completed across all semesters.

Step 1: Determine Credit Units (CU)

Each course carries a specified number of credit units representing its academic workload.

Step 2: Determine Grade Points (GP)

Grade points are assigned according to the grading scale:

A = 5.00

B = 4.00

C = 3.00

D = 2.00

E = 1.00

F = 0.00

Step 3: Calculate Quality Points (QP)

Quality Points for each course are obtained by multiplying the Credit Units by the Grade Point earned.

$$QP = CU \times GP$$

Step 4: Calculate Total Quality Points (TQP)

$$TQP = \Sigma(CU \times GP)$$

Step 5: Calculate Total Credit Units (TCU)

$$TCU = \Sigma CU$$

Step 6: Compute CGPA

$$CGPA = TQP \div TCU$$

Or:

$$CGPA = \Sigma(CU \times GP) / \Sigma CU$$

4. PRACTICAL EXAMPLE

Assume a student takes the following courses:

Course 1:

Credit Units = 3

Grade = A (GP = 5.00)
Quality Points = $3 \times 5 = 15$

Course 2:
Credit Units = 4
Grade = C (GP = 3.00)
Quality Points = $4 \times 3 = 12$

Course 3:
Credit Units = 2
Grade = B (GP = 4.00)
Quality Points = $2 \times 4 = 8$

Total Credit Units (TCU)

$TCU = 3 + 4 + 2 = 9$

Total Quality Points (TQP)

$TQP = 15 + 12 + 8 = 35$

CGPA

$CGPA = 35 \div 9 = 3.89$

Degree Classification

A CGPA of 3.89 falls within the Second Class Upper Division category.

5. OFFICIAL ACADEMIC STATEMENT

The University of Nigeria, Nsukka operates a standard 5-point grading system in which a CGPA of 5.00 is the maximum attainable academic performance. A grade of E (1.00 Grade Point) represents the minimum passing grade for an individual course, while a minimum cumulative CGPA of 1.00 is required for graduation. The final CGPA is calculated by dividing the total accumulated quality points by the total credit units earned throughout the student's academic programme.
